## Product Testimonial

Non-Skid Paint Marine Epoxy MG96M Series

Jim,

I've used your product several times over the last 4-5 years and it works great.

I get a few seasons out of the non-skid coating. It is easy to apply and does a good job preventing slip and falls while NOT taking the skin off bare feet like similar products can do.

I find mixing the polar white and shipstone gray together make it a pleasant lighter gray deck color that doesn't get too hot in the sunshine like the darker gray does.

I recommend it to boat owners and all my friends.
